Latest Telegraphic News.

The steamer Alabama, in six days from Chagres, with sixteen days later from San Francisco, has arrived at New Orleans, whence we have telegraphic despatches announcing the arrival at Panama, by the steamers, the Tennessee and the Columbia, of a million and a half dollars in gold dust. The Alabama also has a large amount on freight. The news will be found in its appropriate place; and we may anticipate full details by one of the steamers from Chagres to this port,

From Washington we learn that the government are taking all possible steps to stop the embarkation of the invaders of Cuba, but it does not appear that they are well informed on the genuine movements of the expedition. Some steps have been taken, also, with respect to the remonstrance of Mexico about the neglect of the treaty stipulations. If the government expect to do anything with the forces now at their command, they are in error. The Camanche warriors are terrible fellows to deal with in the open field, and will never be subdued except by an army directed with immense force and pumbers against them.

There is a smell of gunpowder about Washington-Lieut. Alvarado Hunter and Passed Midshipman S. Nicholson having had some difficulty at a dinner table.

There has been more resigning among the democents. The Uties Convention has been broken up by the retreat of the hunkers. This business is getting fashionable, and may possibly be introduced into Congress during the next session.

The Religious Anniversaries of 1851.

We learn, by the announcement published elsewhere in our columns, that the religious anniversaries will commence in this city to-morrow evening. Many of those who come to New York at this season, as to their religious Mecca, have already arrived, and many thousand strangers will probably be in the city during the next week, to take part in the proceedings of the various religious bodies which meet an such occasions. We observe, with much satisfaction, that there are to be no meetings of anti-slavery fanatics, such as we had last year, and that the city will not be disturbed by any rows epringing from their atheism, blasphemy, and disrespect to the memory of the patriots of the revolution and the patriots of the present day. Your Garrisons, your Phillipses, your Abby Kellys, will confine their violent outeries to the region of Syracuse, where they will meet in the course of the month. The only anti-slavery meeting here will be that of the society over which Arthur Tappan presides-a very harmless and well-disposed body, compared with those who have recently urged the colored race to deal in blows and blood at Boston, and who not only countenance disobedience to the laws of God and man, but openly recommend it as the highest good. We are happy to have the city free of these doers of mischief and counsellors of everything that is repugnant to peace and good order in society.

The religious bodies in this city have some well designed organizations for the improvement of mankind, which are not sufficiently esteemed by the public. For these we are always ready to do all in our power, and we shall present very accurate reports of the proceedings of all societies, that the public may judge, from the manner in which they are conducted, which are most worthy of the support of a Christian community.

A CLOAR, BUT NO HAT .- Our friend Bishop Hughes received, at Rome, on the third of last month, as we learn by our correspondence, the formal investiture of the Pallium. This is, an honor not quite equal to a red hat, but it has its uses.

Over Work Layer than Republican Tue May were THE WHITE HAT. "- The Bermuda Royal Gesette of the 15th of April, contains the addresses of the Executive Council and of the House of Representatives of that eckny, in reply to the speech of the Colonial Governor, Bir Charles Elliott. This personage is the British diplowat who figured so extensively in Texas a few years age, in wily intrigues, en leavering to thwart the annexation of that republic to the United States, Provident Sem Houston "coquetted" and Sirted with him to exeite the jealousy of Brother Jonathan, and induce him to "pop the question" to Tenar. He succeeded, and oft "the mitten to hold " Governor Elliott will be remembered as "the man with the white hat." and is a pretty considerable man in his way, though not quite up to Sir Henry Rulwer. General Sam got the start of him, decidedly in the Texas matters but he had the sid of Old Hickory and Colonel Bonelson, one of the present editors of the Washington Calor, who was the Minister of the United States in Texas. That was one nstance in which a British diplomatist was outsitted by the Yankees.

The Bermuda addresses are quite smoothly written. and the Legislature are very loyal. They thank the British government for the renewal of these communications between the Bermudas and the West Indica and the United States. They thank it, also, for providing the gunpowder necessary to make a certain read-wepresume to hind rocks. They promise to pay a Presbyterian minister for the colony a good salary. They congratulate the Governor on the increased prospecity of the island, proved by the statistics, and that the public partice does not demand additional taxes. They approve to of the plan suggested by His Excellency, for promoting agriculture on the istands by domations of money and they state that their "erchards" and "gardens" are in a fleurishing condition, and they appland the Loudon

PRIE TO SENATOR DOUGLAS. On Wednesday evening, Mr. West, well known as Chairman of one of the Democratic General Committee last year, when two committees claimed the right to guide the democracy, entertained Senator Douglas at a political fete, to which were invited a large number of enders and influential men in the democratic ranks. It understood that this affair has a significancy and a meaning beyond mere courtery and hospitality, or

even the friendship of party. What is in the wind ! VERMONT DISSOCRATIC CONTENTION - The democratic field convention of Vermont, to nominate candidates for covernor, licut, governor, and tressurer, will meet at furlington on the Path inst.

The Canal Enlargement Bill-Meeting of the Democracy in Tammany Hall,

In pursuance of an invitation issued some days since by the Democratic Republican General Committee of Tammany Hall, to the democrats of the city and county of New York, who are in favor of sustaining the com-premise measures and opposed to the agitation of the premise measures and opposed to the agitation of the subject of negro slavery, as it exists in the United States, to assemble in that building on the evening of the second of May, instant, for the purpose of expressing their views in opposition to the Canal Shalargement bill, a meeting of the democracy took place, but in point of numbers, it was the smallest that has taken place in that building for a number of years past. At about eight o'clock, the meeting was called to order, and Robert H. Morris, Eq., elected President.

Behind the chair was the following inscription:—

Strict construction of the constitution—national and State.

Behind the chair was the following inscription:—

Strict construction of the constitution—national and State."

In the opposite end of the room was the following from Washington's Farcwell Address, which has advened the room on two or three previous meetings:—"It is of infinite moment that you should poperly value the importance of your national union, to your collective and individual happiness; that you should cherish a cordial, habitual, and immoves ble attachment to it; accustoming yours clyster to think and trespeak of it as a paliadium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can in any event be abandoned, and indignantly frowning upon the first dawning of every attempt to alicuate any portion of our country from the rest or to enfeable the sacred the which now link together the various parts."

Dariel E. Sirkles, Esq. read the following resolutions, which were adopted unanimously.

Resolved, That the strict construction of the constitutions under which we live, State and Federal, is a cardinal principle of the democratic republican party; that an adherence to this principle, coupled with a determination at all times to comply with the manulates of the fundamental law, has always honorably distinguished the democratic party from all other parties, and from all the factions which have, from time to time, appeared in the United States—to the series of high protective tariffs passed by the whigs in Congress—and to a system of internal improvements by the general government, is mainly due to the conscioutions downton of the American people to the principle of maintaining involute the constitution of the proposition of the democratic of discord and fanalisas, by radiying to the support of the constitution has imposed on the citizens of the everal States.

Resolved, That while the democratic republicance of the preserved and institution has imposed on the citizens of the everal States.

Resolved, T

and institious mank under which a flagrant violation of the ecenstitution is sought to be conceiled by the antiaers of that measure.

Resolved, That the course of the majority in the Senata, in abandenting the usual and necessary measures of legislation, thereby leaving the State government without the indigensable appropriations requisite to carry it on, and thus bringing our State to the verge of revolution or bankruptly, merits, as it receives, the severest denunciation of the democracy of New York the section of the property of the whige majority in the recent session of the Lagislature, alords additional evidence of the characteristic disregard of that party for all legal or constitutional impediments to the attainment of any object which the exigencies of reckless partiaenship may present to their view; that among the proofs of this charge, may be enumerated the retention of a seat in the Sanate by Mr. Schoenmaker, anothered by the political majority in that body, after he had become constitutionally disqualified from holding the office any longer; and, also, the open and undisguised violation of both the law and the constitution, in the proceedings of the Legislature to elect Hamilton Fish to the linited States Senate; and that after these repeated indications of a purpose in the majority to carry any measure, no matter how obnexious to public sentiment, the filmerity of the Scente, in their action on the Cacal Enlargement bill had no alternative except to sit tamely by and witness a skameless violation of the constitution, or else promptly to resign their seats, and throw themselves upon a generous people to vindicate their patriotic course, by a triumphant pre-lection.

They did not deem it advisable to adopt the latter alternative, as speedy action was necessary; and they thought the 2d of May was better than the 20th of April, forgotting that this is the evaning that all well regulated married men stay at home with their wives, to serie up the bedsteads (roars of laughter)—It was owing to this circumstance the meeting was so thim. Yet it was a great question—one to which the heart and mind of every democrat responded, inasmuch as the constitution was above all law, and tied up the hands of legislators. It was an instrument framed by the people for the protection of themselves and their deceembarts, for all time, against the surprations of those to whom might be temporarily delegated the power of had nothly to do with it. Row different was the constitution of the State of New York! It was a substance, making laws for the State. This was the great safeguard of regulation government, and this the whige had violated. Talk of a constitution in flurope! Talk of the Bristish constitution for instance. It was downright hemology. There was no such thing (Cheers) What they called as constitution was like goessmen, which could be blown in any direction by breath the of the aristocracy and their dependents. The people not a shedow, it was a shield and bunkle to every nature to the whole people; and the moment it was a required to the whole people; and the moment it was a required to the whole people; and the moment it was a required to the whole people; and the moment it was a received to the wind the constitution. It had been said by some whom he greatly respected that though the majority of the legislature did wrong and violated the constitution, yet it was equally wrong and revolutionary on the part of the twelve democracy support the constitution. He contended that it was the whigs who were guilty of revolution, and it was not be found to vote against t

Naval Court Marital.—The American squadron will leave Naples in a few days, for Spezzia. The court of inquiry on Captain Latimer, of the Cumberland, after three months, is at length closed. The nature of the cherges preferred by Lieutenant Flag, and supported by a mass of evidence from nearly every officer of the ship, will render it necessary, for the sake of discipline, that an immediate change should take place. It is said Commodore Morgan will transfer his flag to the Cumberland on that account. I should observe, the Americans are in high favor with the Neapolitan government, because the Commodore refuses to receive political offenders on board his ships. It is expected the American steamer Mississippi will leave Naples to take up Kossuth. Orders from Washington to that effect are expected daily.—Naples Leiter, April 4.

FRIDAY, May 2-6 P. M.
Prices were a little better to day. Eric railroad was in demand, but the transactions were principally on time All the securities of this company are improving, but the stock is far in advance of any of the bends, when the differ ence in the rate of interest is considered. Norwich is again moving upwards. Within the past few days prices have been depressed; but the prospects of the company are so good that the market value of the stock cannot long be depreciated. Harlem is the firmest rallroad stock on the t, and holders have such an abiding confidence in the ultimate productiveness of the road that present prices will not bring any stock out of outsiders' hands. Most of the stock floating about the street is in the hands of speculators, and does not amount to near so much as appears by the daily reported sales. A few hundred shares are changed about so often that one would think the sales amounted to thousands. Reading Railroad fluctuates considerably from day to day. Prizes are with diffi-culty sustained. Movements in the coal regions are at present quiet; but any day may get up an excitement and create a derangement in the charges for freight. Edge-worth Company was in moderate request at a slight improvement in prices. This company own about three hundred and fifty acres of land, within four miles of the centre of the city of Boston, which can be reached by three lines of railroad in one quarter of the time it takes to go from Wall street to Union square. This land is fast improving, and the company will make a dividend in June of two dollars and fifty cents a share, out of the assets now on hand. Portsmouth Company has not been very active lately, and prices have fallen off a little. Morris is sustained much better than we anticipated. The sales, to day, were larger than usual, but prices fell off at the close. At the first board, Eric income bonds advanced & per cent; Edgeworth, &; Farmers' loan, &; Merris canal, 14; Eric Railroad, 12; Canton Company, 114. The market, on the whole, was not so buoyant at the close as at the opening.

The receipts at the office of the Assistant Treasurer of

this port, to day, amounted to \$89,500 30; payments. \$48,610-Lalance, \$4,007,426 90.

The Bowery Bank has declared a semi-annual dividend

J. J. Fisk, Esq., having retired from the presidency of the Bank of North America, William F. Havemeyer, Esq., has been unanimously elected to fill the vacancy.

The amount on deposit to the credit of the Treasurer of the United States, in the various depositories, subject to draft on the 28th of April, was \$15,772,672 02, of which \$3.552,800 38 was in the New York depository; \$2.008.059 50 in Boston: \$6.711.150 in the mint. Philadelphia; \$1,100,000 in the mint in New Orleans, and the balance distributed among the other depositories.

The amount of specie imported into Boston during April was \$57,502, of which \$51,800 was gold, and \$5,702 silver. The exports for same period amounted to \$122,-461, of which \$111,100 was in American gold, \$8,061 in foreign gold, and \$3,300 in silver.

The amount of duties collected in the Custom House Philadelphia, in the four months ending April 30, 1851, was \$1.401.806 85, against \$1.188.420 77 for the same period in 1850. Excess this year, \$213.476 08. This is equal to an increase in the importations for the first four months this year, of about one million of dollars.
